OUTLYING TERRITORIES AND POSSESSIONS

INTRODUCTION

An enumeration of the population of Alaska, Hawaii, Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, and the Panama Canal Zone was taken as a part of the Fifteenth Census. No provision was made in the Fifteenth Census act for the enumeration of the population of the Philippine Islands. The latest census of the Philippines was taken as of December 31, 1918. A census of agriculture was also taken in 1930 in all of the outlying territories and possessions except the Philippine Islands and the Panama Canal Zone.

Population.—The tables in this section of the Abstract present the population of each territory or possession by cities and principal political divisions, and by sex, color, and nativity, with comparative figures for 1920.

Agriculture.—The statistics of agriculture presented in this section show in condensed form for each territory or possession the acreage in farms, livestock on farms, crops, and livestock products. Because of the widely different character of agriculture in the various territories and possessions, the figures are not always strictly comparable as between areas or with the corresponding statistics for continental United States.

Detailed reports.—The general report entitled "Outlying territories and possessions" is published by the Census Bureau in one volume, in which a separate chapter is devoted to each territory or possession. Each of these chapters has been separately published in bulletin form.
